

MUBASHIR

FULL STACK DEVELOPER | REACT.JS | NODE.JS | TYPESCRIPT

☎ +91 9946751059 | ✉ mubashir15700@gmail.com | in [linkedin.com/in/mubashir-m](https://www.linkedin.com/in/mubashir-m) | 🐙 github.com/Mubashir15700

SUMMARY

Full-Stack Developer with 1 year 4 months of professional experience building scalable web applications using React.js, TypeScript, NestJS, and Node.js. Demonstrated success in optimizing database queries by 40%, developing type-safe REST APIs, and implementing transactional business workflows. Skilled in real-time communication using Socket.IO, modern state management, and secure payment integrations.

TECHNICAL SKILLS

Languages : JavaScript, TypeScript
Frontend : React.js, Next.js, Redux Toolkit, RTK Query, Zustand, Tailwind CSS, Material UI
Backend : Node.js, Express.js, NestJS, REST APIs, RabbitMQ, BullMQ
Databases : MongoDB, MySQL, Redis, Mongoose, Prisma
DevOps : Docker, CI/CD, AWS EC2, AWS S3, Nginx, Vercel
Testing : Jest, React Testing Library, Cypress
Integrations : JWT, OAuth 2.0, Socket.IO, Stripe, Razorpay, Cloudinary
Tools : Git, GitHub, Bitbucket, Postman, Swagger, Jira
Concepts : Microservices, State Management, Responsive Design, Performance Optimization

EXPERIENCE

Full-Stack Developer — Nibav Home Lifts, Chennai Aug 2024 – Jan 2026

Transitioned from Contract Employee (SS India Solutions) to Permanent Corporate Hire based on performance.

Developed and maintained business-critical applications across Sales, LMS, Finance, Services, and Operations, focusing on scalable frontend development and reliable backend systems.

- Developed scalable **React.js** applications using **Redux Toolkit** and **Material UI**, building responsive interfaces and managing complex application state.
- Developed type-safe **RESTful APIs** using **Node.js**, **NestJS**, and **TypeScript** to support frontend applications and business-critical workflows.
- Implemented atomic **MySQL transactions** within **NestJS** services to execute multi-module business workflows, ensuring data consistency across Finance and Operations.
- Optimized database queries using **Prisma ORM** and **MySQL**, reducing application load times by approximately **40%**.
- Enhanced the internal **Learning Management System (LMS)**, implementing course administration workflows and improving the overall user experience.
- Improved frontend performance through **code splitting**, **lazy loading**, and API optimization techniques.
- Implemented **unit and integration tests** using **Jest** and **React Testing Library** to improve application reliability and maintainability.

ACHIEVEMENTS

Letter of Appreciation (May 2025) – Recognized by the HRBP Team at Nibav Home Lifts for delivering high-impact features and performance optimizations that enhanced product quality.

Best Performing Team (April 2025) – Contributed significantly to achieving all project milestones on time, driving operational excellence and earning the title of Best Performing Team.

PROJECTS

EduTech Course Directory - Full-Stack Learning and AI Platform

 [Live Demo](#) |  [GitHub](#)

A MERN and TypeScript-based educational platform featuring course discovery, AI-powered assessments, real-time notifications, and secure payments.

- Developed responsive interfaces using **React.js**, **TypeScript**, **Redux Toolkit**, and **Tailwind CSS**.
- Implemented course discovery with search, filtering, sorting, and pagination using **RTK Query**.
- Developed a secure backend using **Node.js**, **Express.js**, **MongoDB**, **JWT**, and **Zod** validation.
- Integrated **@google/genai SDK** with **Gemini 2.5 Flash** to generate structured AI-powered quizzes.
- Built real-time notification workflows using **Socket.IO** and implemented asynchronous email processing with **BullMQ**, **Redis**, and **Nodemailer**.
- Integrated **Stripe Checkout** for secure payment processing and deployed the application using **Render**, **Vercel**, and **MongoDB Atlas**.

MicroSphere - Node.js Microservices Architecture

 [GitHub](#)

A distributed microservices-based system demonstrating service isolation, asynchronous messaging, real-time communication, and containerized deployment.

- Developed independent **Auth**, **User**, **Task**, **Notification**, and **API Gateway** services using **Node.js**, **Express.js**, **TypeScript**, and **Docker**.
- Implemented **JWT authentication**, **Redis caching**, and **RabbitMQ** for event-driven asynchronous communication between services.
- Built a **Notification Service** using **MySQL**, **Prisma ORM**, and **Socket.IO** for real-time client updates.
- Developed a **Next.js** frontend using **TypeScript** and **Zustand**, integrating real-time notifications.
- Orchestrated **MongoDB**, **Redis**, and **RabbitMQ** using **Docker Compose** and integrated **Swagger** and **Jest** for API documentation and testing.

TaskTrack - Skilled Labor Connection Platform

 [GitHub](#)

A full-stack platform connecting users with skilled tradespeople, enabling users to post jobs and laborers to discover and apply for tasks.

- Built a full-stack platform using **React.js**, **Node.js**, **Express.js**, and **MongoDB**, following repository architecture principles.
- Implemented location-based matching using the **Haversine formula**, **OpenCage API**, and **Leaflet** maps.
- Implemented authentication using **OAuth 2.0** and **JWT**, with real-time communication through **Socket.IO**.
- Integrated **AWS S3** for image storage and **Stripe** for subscription and job transaction payments.
- Developed an admin dashboard for managing users, subscriptions, payments, and service requests.

EDUCATION

BCA - Bachelor of Computer Application

Jun 2020 - Apr 2023

Calicut University
