

MUBASHIR

FULL STACK DEVELOPER | REACT.JS | NODE.JS | MONGODB | TYPESCRIPT

☎ +91 9946751059 | ✉ mubashir15700@gmail.com | in [linkedin.com/in/mubashir-m](https://www.linkedin.com/in/mubashir-m) | 🐙 github.com/Mubashir15700

SUMMARY

MERN Full-Stack Developer with 1 year 4 months of professional experience developing end-to-end web applications using MongoDB, Express.js, React.js, Node.js, and TypeScript. Worked on business applications across Learning Management, Finance, Sales, Services, and Operations, building responsive interfaces and robust REST APIs. Skilled in microservices, Socket.IO, secure payment integrations, and modern web development practices.

TECHNICAL SKILLS

Languages : JavaScript, TypeScript
Frontend : React.js, Next.js, Redux Toolkit, RTK Query, Zustand, Tailwind CSS, Material UI
Backend : Node.js, Express.js, NestJS, REST APIs, RabbitMQ, BullMQ
Databases : MongoDB, MySQL, Redis, Mongoose, Prisma ORM
DevOps : Docker, Docker Compose, CI/CD, AWS (EC2, S3), Nginx, Vercel
Testing : Jest, React Testing Library, Cypress
Integrations : JWT, OAuth 2.0, Socket.IO, Stripe, Razorpay, Cloudinary
Tools : Git, GitHub, Bitbucket, Postman, Swagger, Jira
Concepts : MERN Architecture, Microservices, Event-Driven Systems, Performance Optimization

EXPERIENCE

Full-Stack Developer — Nibav Home Lifts, Chennai

Aug 2024 – Jan 2026

Transitioned from Contract Employee (SS India Solutions) to Permanent Corporate Hire based on performance.

Developed and maintained business-critical applications across Sales, LMS, Finance, and Operations, contributing to scalable frontend systems, backend services, and database optimization.

- Built scalable **React.js** interfaces using **Redux Toolkit** and **Material UI**, managing complex application state across enterprise workflows.
- Developed type-safe **RESTful APIs** using **Node.js**, **Express.js**, **NestJS**, and **TypeScript** to support core business workflows.
- Implemented atomic **MySQL transactions** within **NestJS** services, maintaining data consistency across Finance and Operations workflows.
- Optimized database queries and access patterns using **Prisma ORM** and **MySQL**, reducing application load times by approximately **40%**.
- Enhanced the internal **Learning Management System (LMS)**, implementing course administration workflows and improving the user experience.
- Improved frontend performance through **code splitting**, **lazy loading**, and API optimization techniques.
- Implemented **unit and integration tests** using **Jest** and **React Testing Library** to improve application reliability and maintainability.

ACHIEVEMENTS

Letter of Appreciation (May 2025) – Awarded by the HRBP Team at Nibav Home Lifts for driving core application optimizations and high-impact features.

Best Performing Team (April 2025) – Honored for leading critical milestone releases on time, establishing operational standards across cross-functional sprints.

PROJECTS

EduTech Course Directory - Full-Stack Learning and AI Platform

 [Live Demo](#) |  [GitHub](#)

A full-stack educational platform supporting course discovery, AI-powered quiz generation, and secure payments.

- Built a secure **Node.js/Express** backend backed by **MongoDB**, enforcing data validation via **Zod** and **JWT** access tokens.
- Integrated the **@google/genai SDK** using **Gemini 2.5 Flash** to construct dynamic, structured assessment quizzes.
- Orchestrated real-time user notification queues utilizing **Socket.IO**, alongside background email dispatchers powered by **BullMQ** and **Redis**.
- Developed course discovery features using **React.js** and **RTK Query**, including search, filtering, sorting, and pagination.
- Implemented payment gateways using **Stripe Checkout**, deploying the stack across **Render**, **Vercel**, and **MongoDB Atlas**.

MicroSphere - Node.js Microservices Architecture

 [GitHub](#)

A distributed microservices system demonstrating service isolation, asynchronous messaging, and real-time communication.

- Designed and implemented independent **Auth**, **User**, **Task**, **Notification**, and **API Gateway** services using **Node.js**, **Express.js**, **TypeScript**, and **Docker**.
- Established asynchronous, inter-service communications using **RabbitMQ** exchanges and optimized data fetch speeds via **Redis caching**.
- Built a real-time **Notification Service** using **Socket.IO**, **Prisma ORM**, and **MySQL**.
- Developed a **Next.js** frontend using **TypeScript** and **Zustand** to consume service APIs and display real-time notifications.
- Orchestrated **MongoDB**, **Redis**, and **RabbitMQ** using **Docker Compose**, with **Swagger** for API documentation.

TaskTrack - Skilled Labor Connection Platform

 [GitHub](#)

A location-based service marketplace connecting users to local tradespeople using geospatial matching routines.

- Built the platform using **React.js**, **Node.js**, **Express.js**, and **MongoDB**, following repository architecture principles.
- Implemented geospatial search algorithms using the **Haversine formula**, **OpenCage API**, and interactive **Leaflet** maps.
- Configured identity authentication via **OAuth 2.0** and **JWT**, establishing persistent socket links for live job updates.
- Integrated **AWS S3** for image storage and **Stripe** for subscription and job transaction payments.
- Developed an admin dashboard for managing users, subscriptions, payments, and service requests.

EDUCATION

BCA — Bachelor of Computer Applications
Calicut University

Jun 2020 – Apr 2023
