

MUBASHIR

MERN STACK DEVELOPER

☎ +91 9946751059 | ✉ mubashir15700@gmail.com | in [LinkedIn](#) | 🐙 [GitHub](#)

SUMMARY

Full Stack MERN Developer with 1.3+ years of experience building scalable web applications using React.js, Node.js, TypeScript, and MongoDB. Skilled in developing RESTful APIs, microservices architectures, real-time systems, and secure payment workflows. Strong understanding of frontend performance optimization, database design, event-driven communication, and containerized deployments using Docker and RabbitMQ.

TECHNICAL SKILLS

Programming Languages : JavaScript, TypeScript
Frontend Technologies : React.js, Next.js, Redux Toolkit, RTK Query, Zustand, Tailwind CSS, Material UI, shadcn/ui, Bootstrap, Sass
Backend Technologies : Node.js, Express.js, Nest.js, REST APIs, RabbitMQ, BullMQ, Swagger, Winston
Databases and ORMs : MongoDB, MySQL, PostgreSQL, Mongoose, Prisma, Redis
DevOps and Deployment : Docker, CI/CD, AWS EC2, AWS S3, Nginx, Vercel
Developer Tools : Git, GitHub, Bitbucket, Postman, Multer, Nodemailer, Husky, Jira
Integrations : JWT, OAuth 2.0, Socket.IO, Cloudinary, Stripe (with Webhooks), Razorpay
Testing : Jest, React Testing Library, Cypress
Additional Skills : Microservices, Data Structures and Algorithms, React Native, GraphQL, Firebase

EXPERIENCE

Full-Stack Developer — Nibav Home Lifts, Chennai Aug 2024 – Jan 2026

Progressed from Contract Employee (via SS India Solutions) to Permanent Full-Time Corporate Hire

Contributed to developing and maintaining multiple business-critical applications across Sales, LMS, Finance, Services, and Operations, with a focus on delivering scalable frontend experiences and reliable backend systems.

- Designed and developed scalable **React.js** applications using **Redux Toolkit** and **Material UI**, improving state management and cross-device accessibility.
- Enhanced the internal **Learning Management System (LMS)**, streamlining course administration workflows and improving user engagement.
- Developed and integrated type-safe **RESTful APIs** using **NestJS** and **TypeScript**, enabling efficient frontend-backend communication.
- Implemented complex business workflows using **MySQL transactions** and **NestJS**, ensuring data consistency across multiple modules.
- Optimized database queries using **Prisma ORM** and **MySQL**, reducing application load times by **40%**.
- Improved frontend performance through **code splitting**, **lazy loading**, and API optimization techniques.
- Strengthened application reliability by implementing **unit and integration tests** using **Jest** and **React Testing Library**.

ACHIEVEMENTS

Letter of Appreciation (May 2025) – Recognized by the HRBP Team at Nibav Home Lifts for delivering high-impact features and performance optimizations that enhanced product quality.

Best Performing Team (April 2025) – Contributed significantly to achieving all project milestones on time, driving operational excellence and earning the title of Best Performing Team.

PROJECTS

EduTech Course Directory - Full-Stack Learning and AI Platform

[🌐 Live Demo](#) | [📄 GitHub](#)

A MERN and TypeScript based educational ecosystem featuring server-state caching, secure payments, and AI-powered evaluation systems.

- Developed responsive user interfaces using **React.js**, **TypeScript**, **Redux Toolkit**, and **Tailwind CSS**.
- Implemented advanced course discovery with search, filtering, sorting, and pagination using **RTK Query**.
- Integrated **@google/genai SDK** with **Gemini 2.5 Flash** to generate structured AI-powered quizzes.
- Built real-time notification workflows and live state synchronization using **Socket.IO**.
- Developed a secure backend using **Node.js**, **Express.js**, **MongoDB**, **JWT authentication**, and **Zod validation**.
- Integrated **Stripe Checkout**, **BullMQ**, **Redis**, and **Nodemailer** for payment processing and asynchronous email delivery.
- Deployed the application using **Render**, **Vercel**, and **MongoDB Atlas** for reliable hosting and scalability.

MicroSphere - Node.js Microservices Architecture

[📄 GitHub](#)

A distributed microservices-based system showcasing scalable service boundaries, real-time communication, asynchronous messaging, and containerized deployment.

- Developed independent **Auth**, **User**, **Task**, **Notification**, and **API Gateway** services using **Node.js**, **Express.js**, **TypeScript**, and **Docker**.
- Implemented **JWT authentication**, **Redis caching**, and **RabbitMQ** for event-driven, asynchronous communication.
- Built a **Notification Service** using **MySQL**, **Prisma ORM**, and **Socket.IO** for real-time client updates.
- Developed a **Next.js** frontend with **TypeScript**, **Zustand**, and real-time notifications.
- Orchestrated **MongoDB**, **Redis**, and **RabbitMQ** via **Docker Compose** for seamless local development.
- Integrated **Swagger**, **Jest**, **Husky**, **ESLint**, and **Prettier** to improve API documentation, testing, and code quality.

TaskTrack - Skilled Labor Connection Platform

[📄 GitHub](#)

A full-stack platform connecting users with skilled tradespeople. Users can post jobs with detailed requirements, and laborers can search and apply for tasks.

- Built a full-stack platform using **React.js**, **Node.js**, **Express.js**, and **MongoDB** following repository architecture principles.
- Implemented location-based matching using the **Haversine formula**, **OpenCage API**, and **Leaflet** maps.
- Secured authentication using **OAuth 2.0**, **JWT**, and real-time communication through **Socket.IO**.
- Added image cropping functionality using **react-cropper** and integrated cloud storage with **AWS S3**.
- Integrated **Stripe** payment workflows for subscriptions and job transactions.
- Developed an admin dashboard to manage users, subscriptions, payments, and service requests.
- Deployed the application on **AWS EC2** for reliable hosting and scalability.

EDUCATION

MERN Stack Development

May 2023 - Aug 2024

Brototype, Calicut

BCA - Bachelor of Computer Application

Jun 2020 - Apr 2023

Calicut University
